PROFESSIONAL SUMMARY

Highly motivated cybersecurity student with strong problem-solving and troubleshooting abilities, currently transitioning into the IT industry. Experienced technician with a background in working on enterprise servers and actively developing technical skills through home labs focused on virtual machine (VM) and cloud management. Demonstrates a deep passion for technology and continuous learning, with a strong commitment to acquiring new skills, broadening expertise, and contributing effectively to a new role. Adaptable, quick to learn, and well-prepared to excel in fast-paced, dynamic environments.

EDUCATION

University of Miami   Miami, Florida
Cybersecurity Certificate   October 2024- June 2025
Courses: Linux, Networking security, Microsoft Security and system administration
EDP University   Puerto Rico
 Associate degree- Nursing and Health Professions**.**   June 2007- June 2010

CERTIFICATION & SKILLS PROFILE

Certifications: Goggle Cybersecurity certification. Currently pursuing CCNA and Security+ certifications.
Operating Systems: Linux, Windows 10 and 11, MacOS.
Networking: VPN, static routing
Programming Languages: Power shell, Bash. SQL
Tools: Microsoft 365 and Azure platform, Wireshark

PROFESSIONAL PROJECTS

Active Directory Implementation with VM:
- Implemented and configured Active Directory domain controller within a virtual machine environment using VMware Workstation.
- Managed user accounts, group policies, and network services, ensuring security and efficiency.
- Utilized Server Manager to automate tasks and streamline management processes.

Network Traffic Analysis using Wireshark
- Conducted in-depth packet level analysis of network traffic to identify anomalies, protocol behaviors, and performance bottlenecks
- Captured and filtered live traffic to detect issues such as DNS leaks and TCP retransmissions.
- Developed custom filters to streamline diagnostics across protocols like HTTP, DNS, DHCP, and SSL/TLS.

PROFESSIONAL EXPERIENCE

LOW VOLTAGE TECHNICIAN /DML Security   **2019- 2025**
Planning and installing from conduit work, wire runs, terminals Cat5, Cat6. Installation of the cameras and access control devices, along with programming IPs with networks.
- Provide service and maintaining HOA (homeowner association) properties, security and access control Systems.
